A Land Reform Bill for Wales, similar to the Scottish Act

THE PETITION. The Welsh Assembly Government is urged to consider and implement a Bill to benefit Wales that would enshrine access rights and responsibilities for the public to and along natural resources in the same way that the Scottish Land Reform Act encourages co-operative use of the outdoors for healthy, low impact recreation.
This bill must provide and permit access to and along non-tidal water in the face of the massive lack of legal clarity and restrictions that exist at present, which act as a barrier to sport and recreation and the promotion of Wales as a place to visit for Adventure Tourism.

DESIRED OUTCOME. Primary legislation is introduced to enshrine and enhance public access and responsibilities to natural resources (including inland water) within common sense guidelines so as to protect the environment and allow healthy recreation.

WHO WE NEED TO INFLUENCE. Welsh Assembly Government

HOW LONG WILL WE CAMPAIGN. Until legislation is introduced. Petition to run until Dec '08
